Education

Maharaja Surajmal Institute of Technology (MSIT) — New Delhi, India
B.Tech — Computer Science & Engineering | GPA: **9.54 / 10** | 2027 Batch (No Active Backlogs) — *Aug 2023 – 2027*

K. R. Education Centre — Kanpur, UP
Higher Secondary (Science) — ***95.2%*** (Class XII) — *2023*

Technical Skills

Languages: Python, C, C++, JavaScript, SQL (MySQL), HTML5, CSS3
CS Fundamentals: OOPs (Python/C++), Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Web & API Dev: React.js, Django REST Framework, FastAPI, RESTful APIs, JWT Authentication, Bootstrap
AI / ML / Data Analytics: Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV, YOLO-v5, Power BI, Tableau
Databases: MySQL (relational, indexing, joins, transactions), NoSQL (fundamentals)
Cloud & DevOps: Docker (fundamentals), GitHub Actions (CI/CD), Git, Linux, Azure (fundamentals)
Tools: Google Colab, Jupyter Notebook, VS Code, Figma, Sphinx, LaTeX

Experience

Software Engineer Intern — May 2025 - Jul 2025
DataTroops

- Engineered and refactored **6 high-traffic React.js components** applying **OOP design principles**; improved Lighthouse score **64** → **89**, directly boosting SEO rankings and Core Web Vitals.
- Reduced UI defect rate by **40%** over 10 weeks by implementing systematic component-level testing and reporting frameworks, enabling data-backed QA decision-making adopted across the full engineering team.
- Collaborated with cross-functional developers and QA stakeholders to gather business requirements, translate them into actionable technical solutions, and deliver end-to-end feature implementations aligned with client needs.

Projects

InsightIQ – AI-Enabled Full-Stack Analytics Platform | *Python, Django REST, FastAPI, MySQL, Scikit-learn, Streamlit* — Ongoing

- Built an **AI-enabled analytics application** with **Django REST / FastAPI** backend and Streamlit frontend; applied **OOP-based** modular architecture for scalable, maintainable data processing pipelines.
- Designed **normalized MySQL database schemas** with optimized **SQL** queries across 10,000+ records; applied **DBMS** concepts (indexing, joins, transactions) achieving sub-second response times.
- Integrated **ML models** (Linear Regression, Random Forest) for predictive **data analytics**, achieving ∼87% accuracy; exposed via **RESTful API** to automate intelligent business reporting — directly applicable to CRM and analytics use cases.

HealthSync – Role-Based Healthcare CRM Platform | *React.js, Django REST, MySQL, JWT, Git* | GitHub — Feb 2026

- Developed a **full-stack CRM-style web application** using **OOP-driven** Django models and **React.js**; applied **DBMS** design for appointment tracking and role-specific patient record management.
- Secured **REST API** endpoints with **JWT authentication**; implemented **HTML5/CSS3** responsive UI and delivered complete ownership across the **SDLC** from design through deployment.

AgriBuzz – AI-Driven Farm Management Platform | *Python, YOLO-v5, FastAPI, Bootstrap, HTML5, CSS3* | Live — Aug 2024

- Deployed a **deep learning (YOLO-v5)** model trained on **18,000+ images** for real-time plant disease classification; exposed inference via a **FastAPI REST endpoint** integrated with a **Bootstrap/HTML5/CSS3** web frontend.
- Integrated live **weather API** data pipelines with calendar dashboards — end-to-end **AI-enabled application** from model training to cloud deployment, demonstrating full application development lifecycle.

Achievements & Recognition

Women Engineers (WE) Scholar – Cohort 6 | TalentSprint × Google | Certificate — Feb 2024 - Mar 2026

- Selected among **top 200 from 30,000+ applicants** (0.6% selection rate); awarded **Rs. 1 Lakh scholarship** and 2-year mentorship in advanced software engineering, cloud, and AI industry practices.

Deloitte Technology Consulting Simulation | Forage | Certificate — April 2026

- Completed Deloitte's virtual technology **consulting simulation**; practised **cloud-first architecture** thinking, enterprise problem decomposition, and agile collaboration — directly aligned with CG Infinity's consulting and services model.

Google Girl Hackathon – Semifinalist | Google Developers & Women Techmakers — Jan - Feb 2025

- Advanced to **Round 3** from 58,000+ applicants nationwide; solved complex **DSA** and algorithmic problems under competitive conditions, demonstrating strong **analytical and problem-solving** skills.
