Education

Maharaja Surajmal Institute of Technology (MSIT) — New Delhi, India
B.Tech — Computer Science & Engineering | GPA: **9.54 / 10** | 2027 Batch (No Active Backlogs) — *Aug 2023 – 2027*

K. R. Education Centre — Kanpur, UP
Higher Secondary (Science) — ***95.2%*** (Class XII) — *2023*

Technical Skills

Languages: Python, C, C++, JavaScript, SQL (MySQL), HTML5, CSS3
CS Fundamentals: OOPs (Python/C++), Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Web & API Dev: React.js, FastAPI, RESTful APIs, JWT Authentication
AI / ML / Data Analytics: Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV, YOLO-v5
Databases: MySQL (relational, indexing, joins, transactions), NoSQL (fundamentals)
Tools: Google Colab, Jupyter Notebook, Git, Linux VS Code, Power BI, Figma, Sphinx, LaTeX

Experience

Research Intern — Aug 2026 – Present
DRDO – Scientific Analysis Group (SAG)

- Developing and optimizing **statistical permutation tests** for IID and non-IID data using **C++11**, focusing on computational efficiency and scalable analysis of large datasets.
- Analyzing large-scale datasets and implementing optimized statistical workflows to evaluate **significance, randomness, and distributional properties**, with emphasis on reproducibility and performance.
- Developing and integrating a **GUI for entropy analysis tools**, enabling users to configure inputs, execute statistical tests, and interpret results through an accessible interface.

Software Engineer Intern — May 2025 – Jul 2025
DataTroops

- Refactored **6 high-traffic React.js components**, applying **OOP design principles** and improving Lighthouse performance from **64 to 89**.
- Reduced UI defect rate by **40%** through systematic component testing and QA reporting, collaborating with developers and stakeholders to deliver client-focused solutions.

Projects

Restaurant Customer Experience & Performance Analytics | *Python, Pandas, NumPy, Matplotlib, Seaborn* | GitHub — Aug 2026

- Analyzed **restaurant, customer, cuisine, pricing, and rating data** using **Python/Pandas** to identify patterns in customer satisfaction and restaurant performance.
- Developed **KPIs and 6+ visualizations** to evaluate food/service quality, price–satisfaction relationships, cuisine preferences, and restaurant performance while accounting for review volume.
- Translated analytical findings into **actionable business recommendations** for customer segmentation, service improvement, restaurant benchmarking, and value-based pricing.

HealthSync – Role-Based Healthcare CRM Platform | *React.js, Django REST, MySQL, JWT, Git* | GitHub — Feb 2026

- Developed a **full-stack CRM-style web application** using **OOP-driven** Django models and **React.js**; applied **DBMS** design for appointment tracking and role-specific patient record management.
- Secured **REST API** endpoints with **JWT authentication**; implemented **HTML5/CSS3** responsive UI and delivered complete ownership across the **SDLC** from design through deployment.

Achievements & Recognition

Women Engineers (WE) Scholar – Cohort 6 | TalentSprint × Google | Certificate — Feb 2024 - Mar 2026

- Selected among **top 200 from 30,000+ applicants** (0.6% selection rate); awarded **Rs. 1 Lakh scholarship** and 2-year mentorship in advanced software engineering, cloud, and AI industry practices.

Deloitte Technology Consulting Simulation | Forage | Certificate — April 2026

- Completed Deloitte's virtual technology **consulting simulation**; practised **cloud-first architecture** thinking, enterprise problem decomposition, and agile collaboration — directly aligned with CG Infinity's consulting and services model.

Google Girl Hackathon – Semifinalist | Google Developers & Women Techmakers — Jan - Feb 2025

- Advanced to **Round 3** from 58,000+ applicants nationwide; solved complex **DSA** and algorithmic problems under competitive conditions, demonstrating strong **analytical and problem-solving** skills.
