Education

Maharaja Surajmal Institute of Technology — New Delhi, Delhi
Bachelor of Technology in Computer Science and Engineering – ***GPA: 9.52/10*** — *2023 – 2027*

K. R. Education Centre — Kanpur, Uttar Pradesh
Higher Secondary – ***95.2%*** — *2023*

Technical Skills

Languages: Java, Python, C, C++, JavaScript, HTML5, CSS3, MySQL

Frameworks & Libraries: Spring Boot(Basics), Spring Framework, React.js, Django REST Framework, Bootstrap, NumPy, Pandas, Matplotlib, Scikit Learn, OpenCV

Backend & APIs: REST APIs, JWT Authentication, Microservices Architecture, OOP Design Patterns, Data Structures & Algorithms, Fast APIs

Tools & DevOps: Tableau, Power BI, Git, GitHub, GitLab, VS Code, Google Colab, Figma, LaTeX, Tiled, Linux, Windows, Jupyter Notebook

AI / ML: YOLO-V5 (Object Detection), Classification & Regression Models, Large Language Model (LLM) concepts

Soft Skills: Teamwork, Adaptive, Stress Management, Active Listening, Strong Work Ethic

Experience

Software Engineer Intern — May 2025 – Jul 2025
DataTroops

- Boosted Lighthouse score from **64 → 89** by refactoring 6 high-traffic React components on the company's primary marketing page, directly improving SEO and Core Web Vitals.
- Reduced front-end bug backlog by **40% in 10 weeks** by introducing component-level testing (Jest + RTL), a discipline subsequently adopted by the full dev team.
- Collaborated closely with developers and QA teams to deliver features through complete development-to-deployment cycles, mirroring end-to-end product ownership.

Projects

TaskFlow: Team Task Manager | *Java, Spring Boot, React.js, REST API, MySQL, Git, JWT* — *Ongoing*

- Building a full-stack task management web app using **Spring Boot** for backend REST APIs and **React.js** for the frontend – allowing teams to create, assign, and track tasks across projects.
- Implemented **JWT-based login and role-based access** so admins can assign tasks while members can only view/update their own – handling authentication end-to-end.
- Designed a **MySQL** database schema for users, tasks, and projects; wrote Spring Data JPA queries for CRUD operations and status filtering.
- Built **React.js** UI with a task dashboard, status filters (To-Do / In Progress / Done), and a basic activity feed – consuming backend REST APIs via Axios.
- Maintaining clean project structure using **Git** with feature branches; writing modular, documented code following **OOP principles** in Java.

HealthSync: Role-Based Healthcare Management System | *React.js, Django REST, JWT, Git* — *Feb 2026*

- Led **frontend development** of a role-based healthcare platform with separate, protected dashboards for doctors and patients using **React.js**.
- Built responsive UI components for authentication, appointment booking, and profile management; integrated **JWT authentication** and conditional rendering for access control.
- Collaborated cross-functionally with backend developers; followed **Git branching strategy** and participated in peer code reviews.
- Consumed **Django REST Framework APIs** from the frontend, gaining hands-on exposure to RESTful API integration and microservices-style separation of concerns.

AgriBuzz: AI-Powered Farm Management Platform | *YOLO-V5, Python, HTML5, CSS3, JS, Figma* *Aug 2024*

- Implemented a **deep learning model (YOLO-V5)** for plant disease detection trained on **18,000+ images**, demonstrating experience with large dataset processing and AI/ML pipelines.
- Designed and delivered a production-ready, user-friendly web interface with a calendar, live weather API integration, and authentication – shipped within a hackathon timeline.
- Applied **LLM/AI concepts** to plant health advisory features; utilized **classification and regression models** for crop yield prediction.

Achievements & Recognition

Women Engineers (WE) Scholar — Cohort 6 | TalentSprint × Google | Certificate Feb 2024 – Mar 2026

- Selected among the **top 200 from 30,000+ applicants** (0.6% selection rate); awarded **1 Lakh scholarship** and 2-year mentorship covering advanced software engineering and industry practices.

Deloitte Job Simulation | Forage | Certificate April 2026

- Completed Deloitte's virtual job simulation on Forage, gaining hands-on exposure to real-world technology consulting workflows and problem-solving methodologies.

Google Girl Hackathon Semifinalist | Google Developers & Women Techmakers Jan 2025 – Feb 2025

- Reached Round 3, selected from **58,000+ applicants** nationwide.

SheFi Scholar — Season 11 | SheFi Global DeFi & Web3 Programme | Certificate Aug 2024

- Selected from 1,200+ applicants for a cohort advancing women in blockchain, cryptocurrency, and DeFi analytics.
